ABOUT ME

By pursuing a professional career & challenging positions in a competitive and progressive environment, I want to effectively contribute my skills as a UI Designer & Frontend Developer with the advanced technical skills.

Over 10 years of as a Web/UI Designer & Developer I have learned many techniques and proficiency. My professional carrier started with web designer trainee & progressively I moved ahead in web as an UI expert. I have learned identifying consumer needs & incorporating it into UI designing.

I am widely read user's mind, monitoring their interaction with interface and product flow & try to finding loophole in design to make it more users friendly.
